Reconnaissance Meeting at Navy/PIC

1. Enclosure (1) is a tentative outline for a study entitled "Aerial Reconnaissance In Support of Missile Warfare" being conducted by Chicago Aerial Industries. The first meeting at Navy/PIC in support of this study was conducted on 25 June 1959. The meeting was chaired by [REDACTED] were the other two PIC representatives. [REDACTED] of Chicago Aerial Industries were in attendance. The meeting was conducted in Navy/PIC's own inimitable style.

2. It was ascertained that Op 07 has asked Navy/PIC to recommend a package or series of packages of collection sensors for Discoverer. This is the second satellite project that PIC is involved with, the other being TIROS.

3. Fairchild has delivered to WADC-Rome the first scanisizer electronic rectifier for the sum of \$250,000. Approximately the same amount is now being spent to make a new model that will rectify cylindrical section photography (rotary prism panoramic). The claimed resolution on the rectified print is 40-50 lines/mm.
